

# CoeoR

Passive switch/router.

Passive eurorack module.

Select patch points **1** to **8**

Select patch points **A** or **B**

Patch points **1** to **8**  
Ensure that all connections are the same. All **inputs** or all **outputs**.

**CoeoR** is a passive signal switch/router. Patch points **1** to **8** are selected using the rotary switch. The selected patch point is then routed to the toggle switch which selects patch point **A** or **B** completing the connection. **CoeoR** can be used in an 8 in 2 out configuration or 2 in 8 out. If connections **1** to **8** are inputs then connections **A** and **B** must be outputs and vice

Patch points **A** and **B**  
Ensure that both connections are the same. Both **inputs** or both **outputs**.
